

# Covid Safe Business Plan

## WELLBEING OF STAFF

Masks are encouraged to be worn by staff.

Staff will rotate stations every 1-2 hours, after an hourly touch point clean. This will maintain our healthy RSI minimisation protocol.

Employees are to take individual meal breaks or sit 1.5m away from each other. At all other times it is encouraged to wear a face mask.

## WELLBEING OF CUSTOMERS

Access to water stations shall be separate to queuing for bar service, to avoid unnecessary congestion.

Directional arrows will be marked on the ground for guests.

Single use glassware - Guest glassware can no longer be returned to the bar for topping up.

Table Wine/Water - For higher safety measures, we do not endorse table wine, table top-ups or table water jugs. These are a high-level touch point and cannot be adequately sanitised after each guest use.

Guests will be able to visit the bar at any time to receive a new beverage in a fresh clean glass.

## PHYSICAL DISTANCING FOR ALL

A masking tape barrier line will be marked on the ground to signal no further approach to the bar.

Crosses will be marked on the ground to represent a safe 1.5m standing point for queuing for the bar.

A designated staff member will be providing assistance in maintaining social distancing. If co-mingling occurs near the bar areas, guests will be encouraged to return to their seats.

## HYGIENE AND CLEANING

Sanitiser will be supplied behind the bar for staff, and another at the water station for guests to use prior to use.

All touch points and surfaces within the bar area will be sanitised hourly.

All unwanted glassware will be collected promptly and taken to the wash station by staff.

Glassware will be hot washed, before being placed back into the bar.
